

SAPIE

Project Name | SAPIE-EB

Project Code 1 | POCH-04-5267-FSE-000115 (Centro)

Project Code 2 | POCH-04-5267-FSE-000116 (Alentejo)

Project Code 3 | POCH-04-5267-FSE-000117 (Norte)

Main Objective | Reduce the risk of school failure and early abandonment

Intervention Region | North, Centre and Alentejo

Beneficiary Entity | Educoach, S.A.

Approval Date | 16-11-2018

Start Date | 02-01-2018

Conclusion Date | 31-12-2020

Financial Support of the European Union | FSE Incentive of 469 554 Euros

Objectives:

SAPIE is an innovative educational tool used to predict early school abandonment. It sends alerts at the "first sign" of risk on indicators such as school failure, behavior, attendance, psychological health and monitors their evolution over time, contributing to empirically validate the interventions performed, while deepening knowledge regarding causal factors and the processes that underlie them.

Activities:

- Development of the SAPIE-EB online platform
- Implementation of SAPIE in 75 school centres
- Implementation and monitoring
- Impact assessment
- Research on the causes and indicators of school failure

Expected Results:

To avoid retention and school abandonment of 198 students in 2018/19 and 2019/20.
